cytokine−mediated signaling pathway
response to bacterium
chemotaxis
taxis
viral process
viral life cycle
antiviral innate immune response
monocyte chemotaxis
BP
external encapsulating structure
extracellular matrix
collagen−containing extracellular matrix
side of membrane
external side of plasma membrane
secretory granule membrane
azurophil granule membrane
CC
transmembrane signaling receptor activity
receptor ligand activity
signaling receptor activator activity
signaling receptor regulator activity
cytokine activity
G protein−coupled receptor binding
chemokine activity
chemokine receptor binding
